Heavy Weight Cob Mare

£ 3,750

Description

Daisy really is a rare find. She is a heavyweight Cob who really enjoys her job. She is substantially built to carry a heavier or to rider equally has been ridden and is regularly ridden by smaller riders too however on the stick she may only be 14.1 or 14.2hh however carries her as a hand horse would do she is 14 years old and she must be one of the coolest cobs you will meet. As always as videos will give you much more information than any written text so I strongly strongly advise you watch all of her videos which are available on request if you can WhatsApp me I will send them over, if you need to watch them more than once if need be before contacting us further as most of your questions will be answered in there has been a firm favourite on the yard handled and ridden by all of us, as one of the easiest horses to have around she is the ultimate hacking Horse who luckily will

also do everything else too. She's not a plod She's quite a forward going Cob but snaffle mouth and as you can see on our videos that will give you much more indication of her suitability, for what you're looking for feel free to ask any questions.

Additional Category: Broodmares

Age: 14 yrs 8 mths

Height: 14.2 hands

Breed: Cob
